About Me

I would like to introduce myself as a highly organized individual who has a passion for solving problems and coming up with new ideas. I have experience with a wide range of software and Hardware applications through academic projects during my first degree of study as well as the ALX SE program. Working on a project that changes people's lives is the long-term goal I have. I have the vision to enhance my country (Ethiopia) as well as Africa through automation and bringing new solutions and innovations.

Professional Experience
